## **munimula**

quincy michigan's [munimula design](#) focuses on bringing industrial design techniques and aesthetics to the home. their products use materials like aluminum and felt to create modern, clean-lined designs. one of their latest pieces (set to debut at [icff](#), booth 1357) is this modular wine rack. it reminds me of legos and would be super fun for those of you with some extra space to store your favorite vino. you can [click here](#) for more info on munimula. [thanks jenifer!]

[ps: stay tuned for a new podcast at 4!]
